

BUILT SYSTEMS POWDER COATING COLORS

Color Visualization to Promote Lean Manufacturing

A BIT ABOUT POWDER COAT

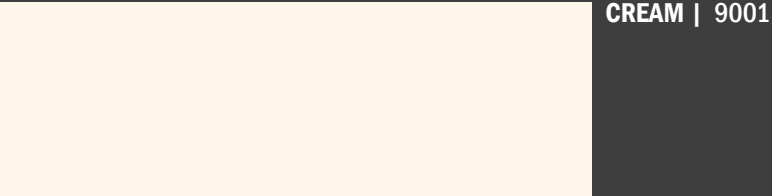

Did you know that we have over 200 color options and our color changeovers are performed in less than 30 seconds?

With two powder coat lines, we give customers their choice of colors utilizing the RAL Color System. Both lines use a phosphate-free wash process, producing environmentally safe wastewater and embrace sustainable principles. For example, during the cooler months, we redirect the heat they generate into the plant as part of our HVAC System.

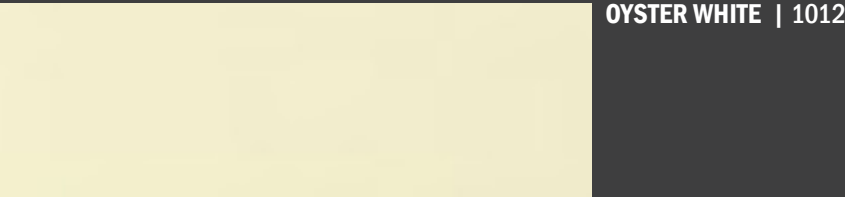

This Color Book represents the current RAL Colors we stock. We can assist in obtaining additional RAL Colors; however, lead time and cost may be affected with a color we do not currently stock.

Please note: While we have made every effort to ensure the accuracy of the color swatches as they are shown in the book, computer monitor and printer settings can alter their appearance. If you require a physical sample, please call your Salesperson or contact Customer Service.
